

STALWART

**Adapter for Olympus Microscope
SCF-Olympus 0.5X**

Description

SCF Series adapters are used to connect C-mount cameras to Leica, Zeiss, Nikon, Olympus Microscopes. The main feature of these adapters is the focus is adjustable, so the images from digital camera and the eyepieces can be synchronous.

SCF Series adapters include 0.5× and 0.66× built-in reducing lens respectively. 0.5× adapters are fit for 1/3", 1/2.5", 1/2.3" image sensors. 0.66× adapters are fit for 1/2", 1/1.8" and 2/3" image sensors. Bring you the best field of view for your digital imaging.

Features

- With the inner focus function, you can synchronize digital images with the eyepiece by just rotating the adapter body slightly.
- The adapters' head are suit for four major Brands microscope families: Leica, Zeiss, Nikon and Olympus.
