Biological Microscope STM-2030 Series

STM-2030B

STM-2030BD

STM-2030T

Introduction

With precision machining equipment and advanced alignment technology, STM-2030 series microscopes are classical biological microscopes. These microscopes are widely used in educational, academic, agricultural and study field. With a microscope adapter, a digital camera (or digital eyepiece) can be plug in to the trinocular tube or the eyepiece tube. Rechargeable battery(only for LED illumination) is optional for outdoors operation or places that power supply is not stable.

Features

- New machining facility and advanced alignment technology.
- Comfortable operation with updated and ergonomic design;
- Compact and flexible, ideally suited for desktop, laboratory worktable;
- Interpupillary distance can be adjusted to fit for oSTMervation;
- Support Windows Vista / Win 7 / Win8 / Win 10 / Mac Operation System. The software can preview, take photos and video, do image processing and measurement;
- Support Multi-language (Arabic, Chinese, English, French, German, Japanese, Polish etc.).
